• Provide participants information about the process for information collection and dissemination

In 2016, IEI held its annual Forum focused on two trends that pose one of the greatest challenges we have ever faced – massive demographic change and rapid technological innovation and disruption. The next step is to move beyond a conference to a dialogue, and to identify next steps in the evolution of the Southeast Prosperity Zone’s regional economy. This event will be designed to connect the dots across organizations, and to generate conversation that is informed by timely and relevant data on the future of the region’s economy. By the end of the event, the goal will be to lay the foundation by identifying a set of key steps the region must take to ensure its vibrancy for the next economic evolution.

Key Questions:

- How far behind are we in workforce preparedness?
- Will the region’s success continue into the future, or do we need to adjust?
- What are the necessary collaborations we need to have to be successful in the future?
